

## **V2 Allergy Conversion Project**

GRA consultants were engaged to provide pharmacy support as well as to provide assistance for their V2 Allergy Conversion project. The GRA pharmacist consultant provided guidance in developing their project charter and plan; performed the mapping and conversion in the TEST environment; assisted with the clean-up of the Drug Identification Numbers, dictionary changes and builds; and ensured all aspects of the allergy conversion process were considered and risks were mitigated. The organization is a regional centre sharing MEDITECH MAGIC (5.63) and Client Server (C/S) (Imaging and Therapeutic Services - ITS) with two partner organizations in the geographical area. All sites have an automatic drug distribution system with drug interfaces to MEDITECH.
